

## **Power Injection Gun Universal with Water Supply**

This high quality brand belongs to the product group “Injector blasting”. The mobile, portable, and simple operating blasting system provides progressive work rates and long-lasting power.

### **Power Injection Gun Universal**

The Power Injector blast gun can be used for the same work as a pressure blast machine and the system shows clear advantages in mobility and cost factor. Pressure blasting units can be ineffective due to their weight and with constant change of location. Especially in such works a power injector blast gun is of great advantage, because with the suction lance it is possible to suck directly out of the media bag and therefore the investment in an extra blasting pot is not necessary. Nevertheless, the Power Gun proves to be extremely effective even for larger jobs and persistent surface impurities.

The Power Injector Gun Universal additionally offers the possibility of a water connection for moist blasting processes to avoid dust formation.

Area of application	water supply for dust-free blasting base surface preparation removing of paint, rust, dirt and scale roughening subsequent blasting of mounted parts
Air consumption	4,8 m³/min (7bar)
Water pressure	min. 2 bar
Water consumption	0 - 2,5 l / min
Abrasive media	suitable for every common media
Maximum grain size	1,5 mm
Media consumption	50 - 150 kg/h

Blasting pressure

0 < > 12 bar
