

Climate Control for Blast Helmets

This high quality branded product belongs to the product group “operator protection”. The first priority is effective safety for operators. Productivity will increase, if operators feel more secure and comfortable. Clemco safety blast accessories protect the blast operator from excessive heat, cold, dust, and noise.

Climate Control for Blast Helmets

The Clemco Climate Control is a cool- and heat-system in one device and serves with best working conditions for the operator even in extreme temperature conditions.
