

Dust Collector – Portable

This high quality brand belongs to the product group “industrial systems”. Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

Portable Dust Collector MB 10000 + MBX-120 C3 or MB 20000 + MBX-156 C4

Our portable dust collectors are offering more than just the ventilation of a blast chamber, it is also your contribution to environment. The filter is vacuuming the dusty air, which occurs during the blast process, and cleans it. Furthermore, a tuned filter system ensures a clear sight and optimal working conditions for the operator, which increases productivity.

By using antistatic polyester cartridges with dust class M, the dust emission is less than 1mg/m³ after the cleaning process. Our portable dust collector units have an individual filter performance of up to 20.000m³ per hour with a maximum filter area of 156m². With a portable dust collector, you get the power and the flexibility you need for your construction site.

Area of application	Free blasting / construction site Portable dust collector
Total dimension: W x H x D *	2990 x 2950 x 2320 mm
Weight *	2200/2350 kg
Air consumption	0,8 m³/min at 5,5 bar
Power consumption	15/30 kW
Ventilator performance / air volume (m³/h)	10000/20000
Dust category	M (<1mg /m³)
Features	C4 version with silencer and frequency converter
* +/- Values, may differ depending on configuration, arrangement and function.
