

## **Carbon Monoxide (CO) Warning Device CMS-2**

This high quality branded product belongs to the product group “operator protection”. The first priority is effective safety for operators. Productivity will increase, if operators feel more secure and comfortable. Clemco safety blast accessories protect the blast operator from excessive heat, cold, dust, and noise.

### **Carbon Monoxide (CO)\*Warning Device CMS-2**

With a visual and acoustic signal, the unit is warning every operator of poisonous carbon monoxide in the breathing air. By connecting the CMS-2 directly with the general air supply via T-piece, the unit is monitoring the whole breathing air and can be used by several operators. The transport box protects the unit of damages and makes it portable.
