

Power Injection Gun - PIG

This high quality brand belongs to the product group "Injector blasting". The mobile, portable, and simple operating blasting system provides progressive work rates and long-lasting power.

- **Effective spot-blasting**
- **Flexible mobility**
- **Simple operation**

Power injection Gun - PIG - Dry System

The Power Injector Gun impresses with its flexibility and strong abrasive effect during surface treatment. Due to the injector principle, the Power Injector Gun does not require a pressure blasting pot, but only a container into which the mounted suction lance can be inserted, this can also be the abrasive bag itself. This eliminates the need to transport a heavy and bulky pressure blasting pot and makes the Power Injector Gun the ideal blasting device for mobile use. Thanks to a coordinated 13 mm blasting nozzle, the same effects can still be achieved as with pressure blasting, making it extremely efficient and highly mobile at the same time.

Area of application	base surface preparation removing of paint, rust, dirt and scale roughening subsequent blasting of mounted parts
Air consumption	4,8 m³/min (at 7bar)
Abrasive media	suitable for every common media
Maximum grain size	1,5 mm
Blasting pressure	0 < > 12 bar
Operating temperature	0°C < > 50°C
Features	Rubberized handle piece (wear protection) Rotating air hose coupling Adjustable trigger lever
