

Suction Unit MB-750 E4

This high quality brand belongs to the product group “industrial systems”. Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

Suction Unit MB-750 E4

The suction unit recovers used abrasive media for recycling. By suction force it transports the media from the blast area through the cleaning module back to the silo, where the abrasive is stored for reuse. The continuous recycling of abrasive media is a central aspect of economical working and the success of your business.

The MB-750 E4 enables a recovery rate of 2-6 tons per hour with a maximum (recommended) distance of 30m.

Area of application	abrasive media recovery system
Total dimension: W x H x D *	1745 x 2175 x 970 mm
Weight *	800 kg
Air consumption	11 m³/min at 0,5bar
Electrical specification	3x 400V, 50 Hz
Power consumption	13 kW
Features	cartridge filter for 6,4m²

* +/- Values, may differ depending on configuration, arrangement and function.
