

## **Suction Unit MB-4000 E5M**

This high quality brand belongs to the product group “industrial systems”. Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

### **Suction Unit MB-4000 E5M**

The suction unit recovers used abrasive media for recycling. By suction force it transports the media from the blast area through the cleaning module back to the vacuumsilo, where the abrasive is stored for reuse. The continuous recycling of abrasive media is a central aspect of economical working and the success of your business.

The MB-4000 E5M enables a recovery rate of 3-35 tons per hour with a maximum (recommended) distance of 90m.

Area of application	stationary and mobile abrasive media recovery system
Total dimension: W x H x D *	2295 x 2595 x 2440 mm
Weight *	4000 kg
Air consumption	66 m³/min at 0,5bar
Electrical specification	3x 400V, 50Hz
Power consumption	70 kW
Features	cartridge filter (4 cartridges) for 40m²
* +/- Values, may differ depending on configuration, arrangement and function.
