

M-Section Media Recirculation

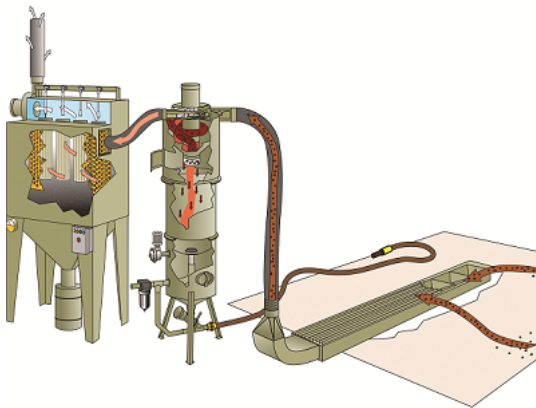

This high quality brand belongs to the product group "industrial systems". Specialized engineers develop tailor-made solutions according to the customer-relevant technical, safety and performance requirements in order to meet every challenge in the steel industry.

M-Section

The M-Section is part of the abrasive recovery and recycle system. Due to its design it is suitable for the installation in already existing blast rooms with limited foundation and especially for light weight media.

Area of application	abrasive media recovery system light blast media (glass beads, corundum, plastic, ceramic etc.)
Restrictions	steel shot only after consultation with our engineers
