TRANSFORMING OUR WORLD

Wet Blast Pump W-92 with transport basket

This high quality brand belongs to the product group „dust control and wetblasting“. The mobile system is characterized by a closed-circuit system with a minimum of dust emission. Another benefit: The closed-circuit system needs fewer protective measures to assure operator safety.

- Minimal dust emission
- Portable and easy to use
- Minimal operator protection required

Engineered by Clemco

Wet Blast Pump W-92 with transport basket

The W-92 serves as a pressurised and self-sucking accessory device for blast machines and can be fed with water directly out of a water tank or the water network. In combination with a wet blast head (KB-25/-52) the pump acts as a wet blast system, which covers the dust in the water and allows a dust free blasting process.

Area of application	dry blasting (air and blast media) washing (air and water) wet blasting (air, water and abrasive media) air-drying
Total dimension: W x H x D *	450 x 600 x 380 mm
Weight *	25 kg
Maximum air pressure	8 bar
Air consumption	0,15m³ /min at 8bar
Water consumption	max. 15l/min
Features	transport basket
* +/- Values, may differ depending on configuration, arrangement and function.
