

Beacon LED Blast Light

This high quality brand belongs to the product group “pressure blast systems”. Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

Beacon LED Blast Light

The powerful 860-lumen LED blast light is especially designed for blast processes and the perfect illumination of work surfaces. The increased sight for the operator leads to a higher productivity and the small size of the light makes it even more flexible. The robust design is completed by Pyrex/borosilicate glass which protects the light from wear. The quick-release-fastener of the wear glass makes it very easy to change.

Electrical specification	9 - 48 Volt
Application	Power supply via external power supply unit (not included)
Features	15m or 30m power cable
