

Blast Helmet Apollo 100

This high quality branded product belongs to the product group “operator protection”. The first priority is effective safety for operators. Productivity will increase, if operators feel more secure and comfortable. Clemco safety blast accessories protect the blast operator from excessive heat, cold, dust, and noise.

Blast Helmet Apollo 100 with cape and air valve

The Apollo 100 blast helmets are especially designed for blasting operations and its extreme situations. It has a lean design, which offers enormous functionality. The attached breathing hose supplies the operator continuously with fresh breathing air during the blast process.
