

Titanium blast cabinet

TA11063

Automatic blast cabinet for titanium parts

Industry	General Aerospace
Material	Titan
Application	Blasting of cylindric titanium parts, inside and outside
Equipment solution	Rotating plate Oscillator Media classifier with vibrator
Application advantage	Reproducible results of the titanium parts through automated processes
Production rate	13 parts / week
Abrasive media	Aluminium oxide
Media reclaimer	Cyclone 900 cfm with PU coating
Dust collector	MBX 2000 cartridge filter with 4 filter cartridges
Blast system	Pressure blasting (100l blast pot)
Electrical requirements	0,5 kW rotation plate 0,25 kW oscillator 0,75 kW cartridge filter
