

Denim jeans blast cabinet

TA03002

Modified BNP 601 blast cabinet for manual blasting of denim jeans.

Application	Blasting of denim pants for individual looks
Equipment solution	Extra door on cabinet backside for fixing the denim pants
Part Handling	The jeans can be mounted on a fixed plate through the cabinet backdoor and be blasted manually in the inside of the cabinet.
Application advantage	Cabinet can be easily loaded from outside. Hanging jeans are blasted more constant and easier than lying pants.
