

BNP 721 with powered turntable

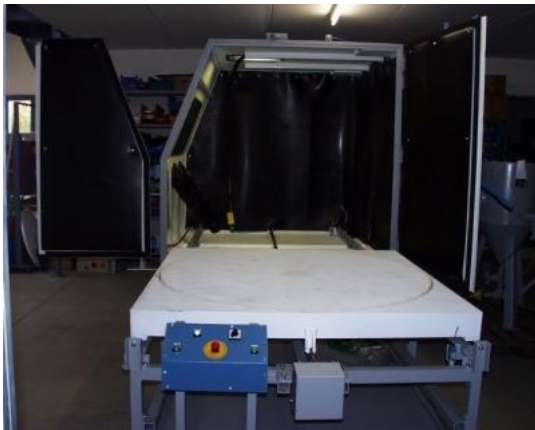

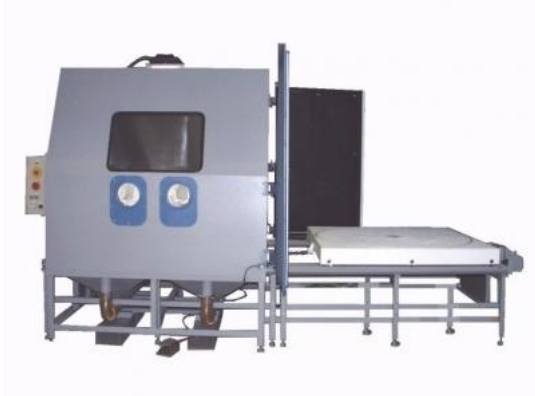

TA03037

BNP 721 blast cabinet with powered and modified turntable.

Application	Blasting of large workpieces that must be blasted from every side
Equipment solution	Standard BNP 721 base cabinet Ø1500mm turntable, powered and at ground level of grating
Part Handling	The workpieces can be loaded via crane on the turntable from outside of the cabinet and from there be transported in the blast cabinet. The workpieces are manually blasted, but rotated automatically by the powered turntable.
Application advantage	Heavy workpieces can be handled in the blast cabinet very easy and the operator can reach every side of it.
Abrasive media	every common blast medias
Media reclaimer	900 cfm cyclone and media silo
Dust collector	MBX cartridge filter
Blast system	Pressure blast system
Electrical requirements	Cartridge filter: 2,2 kW, 400V, 50Hz Turntable: 0,37kW, 230/400V, 50Hz
