

Scaffolding blast cabinet

Scaffolding blast cabinet for poles and platforms.

Application	Cleaning of dirty scaffolding parts (poles and platforms)
Equipment solution	Half automatic blast cabinet with roller shutter door and oscillating blast head
Part Handling	The scaffolding parts are loaded by hand into the blast cabinet and blasted automatically with pre-programmed blast procedures. The scaffolding poles are also automatically rotated to blast them completely.
Application advantage	Consistent and complete blasting of scaffolding parts
Special Options	Space saving roller shutter door Multiple blast head for full-faced blasting
Abrasive media	Glass beads
Blast nozzle	8 x 8mm boron carbide (at the same time)
Media reclaimer	1800 cfm Cyclone
Dust collector	MBX cartridge filter
Air requirements	10m³/min
Blast system	Suctionsystem
