

Blast cabinet with crane slot

TA04051

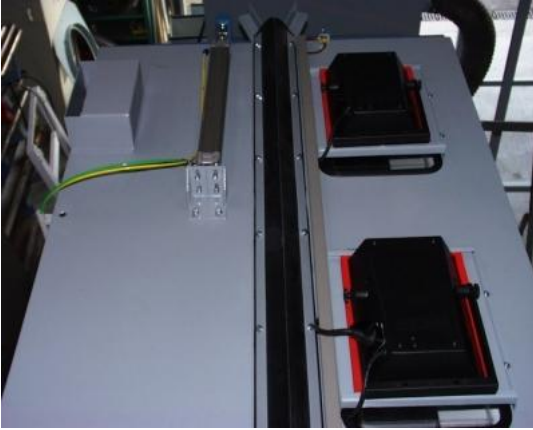

Blast cabinet with slot for external crane rail for workpiece handling

Application	The blast cabinet can be integrated in the process-linking and is especially designed for heavy workpieces.
Part Handling	The workpiece can be loaded into the cabinet via pneumatic doors and an external crane rail. The cabinet has three different workstations for manual blasting of the workpiece.
Application advantage	The cabinet has no maximum payload, this defined by the external crane rail. Furthermore the cabinet can be perfectly integrated in the workflow of the whole process.
Abrasive media	Aluminum Oxide (also suitable for other medias)
Media reclaimer	900cfm cyclone with PU coating
Dust collector	MBX cartridge filter
Blast system	Pressure blast system
