

Pulsar VI blast cabinet for glas plates

TA02016

Modified Pulsar VI blast cabinet with edge gated and interior support frame for glas plates.

Application	Blasting of glas plates (up to 1000mm)
Equipment solution	Edge gated and interior support frame in blast cabinet with rolls for glas plates
Part Handling	The glas plates can be guided into the blast cabinet via support frames that are mounted on the left and right side, as well as in the inside of the cabinet. In the chamber, they will be blasted manually.
Application advantage	Reduced risk of breakage due to easy handling of the glas plates with support frame. Upright positioning in the cabinet for better blasting position.
Media reclaimer	Cyclone
Dust collector	Pulsar cartridge filter
