

Blast cabinet for aerospace parts

TA04011

Large cabinet with three workplaces to blast aerospace parts.

Application	Inside and outside blasting of aerospace parts
Part Handling	After loading the cabinet, the workpiece can be blasted lengthwise and manually from three different workplaces.
Special Options	The cabinet is mounted on tracks to open and close the complete cabinet by sliding the cabinet frame to the side. This system makes it very easy to load and unload long parts into the blast chamber.
Abrasive media	Plastic
Blast nozzle	Tungsten carbide blast nozzle
Media reclaimer	Cyclone
Dust collector	MBX-2000 cartridge filter (4 cartridges)
Blast system	Pressure blast
Electrical requirements	3x400V, 0,25kW
