

## ***Revision set for blast pots and systems***

This high quality brand belongs to the product group “pressure blast systems”. Only the perfect configuration and match of all system components in a blast machine enable maximum blasting efficiency. Therefore Clemco offers an extensive and complete range of quality products.

### **Revision set for blast pots and systems with 1 1/4" piping**

The revision set serves the complete maintenance and servicing of a 1 1/4" piped blast pot and the safety equipment in the system. Blast pots and its abrasive equipment are subject to natural and continuous wear. Despite the highest quality requirements of Clemco products, it is therefore necessary to carry out regular maintenance work in order to maintain performance and extend the service life of the entire system. Regular maintenance is also an essential contribution to the safety of all operators.
